

# ASGS RULER

## INSTRUCTIONS:

The Australian Sheep-Goat Scale assesses the extent to which a person believes or does not believe in so-called psychic (paranormal) phenomena. The straight line for each item has two extreme opinions, one at either end. The participant places a cross or stroke on the line at the place which best corresponds to his or her own opinion.

This page must be printed to the same scale as the original PDF document (Thalbournes\_ASGS.pdf) downloaded from the AIPR website:

<http://www.aiprinc.org/resources.asp>

Cut out the ruler below along the two dotted lines.

Place the ruler under each item line in the participant's completed ASGS questionnaire. One of three domains (0, 1, or 2) indicates the item score depending on where the participant's cross or stroke is placed on the item line. Total score out of 36 is the sum of all 18 of the participant's item scores.
